Bill	Relationship	Last Action
107 S 2670	Identical bill	Nov 22, 2002: Referred to the Committee on Resources, and in addition to the Committee on Agriculture, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

Wildfire Prevention Act of 2002 - Directs the Secretary of Agriculture, acting through the Chief of the Forest Service, to: (1) establish three Institutes (one each in Arizona, New Mexico, and Colorado) to promote the use of adaptive ecosystem management to reduce the risk of wildfires, and improve the health of forest and woodland ecosystems; and (2) provide assistance to the Institutes to promote the use of such management.

Defines adaptive ecosystem management as a natural resource management process under which planning, implementation, monitoring, research, evaluation, and incorporation of new knowledge are combined into a management approach that is: (1) based on scientific findings and the needs of society; and (2) used to modify future management methods and policy.

Prescribes requirements for cooperation among the Institutes and Federal programs relating to ecological restoration, wildfire risk reduction, and wildfire management technologies.
