

HR 954

Home Energy Generation Act

Congress: 107 (2001–2003, Ended)

Chamber: House

Policy Area: Energy

Introduced: Mar 8, 2001

Current Status: Referred to the Subcommittee on Energy and Air Quality.

Latest Action: Referred to the Subcommittee on Energy and Air Quality. (Mar 14, 2001)

Official Text: <https://www.congress.gov/bill/107th-congress/house-bill/954>

Sponsor

Name: Rep. Inslee, Jay [D-WA-1]

Party: Democratic • **State:** WA • **Chamber:** House

Summary (as of Mar 8, 2001)

Home Energy Generation Act - Amends the Federal Power Act to mandate that: (1) each retail electric supplier make available an electric energy meter capable of net metering to certain retail customers that have installed an energy generation unit intended for net metering; and (2) rates, charges, and contract terms for electric energy sales to customer-generators be the same as those that would be applicable if the customer-generator did not own or operate a qualified generation unit and use a net metering system.

Prescribes the manner in which such retail electric suppliers shall calculate the net energy measurement and billing for a customer using a net metering system.

Subjects qualified generation units and net metering systems to specified safety, performance, and reliability standards. Authorizes the Federal Energy Regulatory Commission (FERC) to: (1) adopt additional control and testing requirements for customer-generators necessary to protect public safety and system reliability; and (2) prohibit additional charges by electric suppliers and local distribution systems for equipment or services for safety or performance additional to those necessary to meet such standards.

Sets a deadline for FERC to promulgate: (1) model standards for the physical connection between local distribution systems and qualified generation units and other specified electric generation units; and (2) regulations ensuring simplified contracts will be used for the interconnection of electric energy by electric energy transmission or distribution systems and generating facilities with a power production capacity of 250 kilowatts or less.

Actions Timeline

- **Mar 14, 2001:** Referred to the Subcommittee on Energy and Air Quality.
