Children and Family HIV/AIDS Research and Care Act of 2004 - Amends the Public Health Service Act to require that recipients of certain grants related to human immunodeficiency virus (HIV) research and services for women, infants, and children agree to provide coordinated, family-centered care. Requires the Secretary of Health and Human Services, acting through the Administrator of the Health Resources and Services Administration (HRSA), to award grants to provide health care and other supportive services to youth with HIV designed to recruit and retain youth in care.

Requires that chief elected officials in eligible areas and States allocate certain grant funds using HIV case data rather than acquired immune deficiency syndrome (AIDS) case data as soon as such data is adopted for other allocation purposes. Requires the Secretary to report on the status of using such HIV case data and the impact of this transition on the resources directed to women, infants, children and youth.

Requires the Secretary to award demonstration grants to public and nonprofit private entities to conduct assessments of the effectiveness of certain strategies in reducing the mother-to-child transmission of HIV.

Requires the Director of NIH, acting through the Director of the Office of AIDS Research, to report on activities related to the testing of potential HIV vaccine candidates in relevant pediatric populations.

Requires the Commission of Food and Drugs to issue guidance on the minimum requirements for obtaining Food and Drug Administration (FDA) approval to test an HIV vaccine in pediatric populations and for a pediatric indication of an HIV vaccine.

Requires the Director of NIH to invest in domestic and international research on specified topics related to HIV and pediatric populations.
