(Sec. 102) Sets forth funding rules for single-employer defined benefit pension plans. Requires such plans to amortize unfunded liabilities over not more than seven years. Eliminates a requirement for deficit reduction contributions. Requires a plan's accrued liability, for all benefits accrued by its participants before the current plan year, to be funded completely. Phases in such 100% funding over three years beginning in 2007, and over five years for plans with 100 or fewer participants.

Sets forth special rules for plans at risk of terminating because they are underfunded and sponsored by firms that are financially weak, as determined by bond ratings. Requires such plan sponsors, in determining their required contribution, to assume that participants will retire at the earliest possible date and elect the form of benefit with the highest present value.

(Sec. 103) Sets forth funding-based limits on single-employer plans increasing benefits, distributions, and benefit accruals, which are based on the plan's adjusted funded target liability percentage (funding ratio) as of the valuation date for the preceding plan year. Prohibits a plan amendment from increasing benefits liability if the funding ratio is less than 80% or would be so with such amendment. Prohibits lump-sum payments for a specified period by plans with a funding ratio less than 60%. Prohibits benefit accruals for specified periods for plans with funding ratio less than 60% in the prior year.
