Lead Poisoning Reduction Act of 2006 - Amends the Toxic Substances Control Act to establish a Select Group on Lead Exposure. Requires the Group to: (1) conduct a study of state, tribal, and local programs to protect children from exposure to lead at child-occupied facilities constructed before January 1, 1978; (2) develop baseline standards such programs must meet to receive a grant under this Act; and (3) develop a model program to protect children from exposure to lead at such facilities that can be adopted by state, local, and tribal governments.

Requires the model program to meet or exceed standards that require facilities to be notified as soon as practicable after a child is diagnosed with lead poisoning and to be tested for the presence of lead upon receiving such notification.

Directs the Administrator to: (1) establish a program to provide grants to assist such facilities in carrying out activities to protect children from lead exposure; (2) promulgate regulations requiring such facilities to test applicable exposure pathways for lead, prohibiting states and Indian tribes from issuing a license to such facilities until the testing is complete and the exposure to lead is eliminated, and requiring all child-occupied facilities to eliminate the risk of exposure to lead through applicable exposure pathways; and (3) apply regulations governing lead-based paint activities to contractors and workers engaged in the renovation, remodeling, or painting of such facilities and to establish a program to provide information and training about those activities to them.

Actions Timeline

- **Oct 2, 2006:** Referred to the Subcommittee on Environment and Hazardous Materials.
