No related bills are listed.

Authorizes the President (acting through the Secretary of Health and Human Substances), upon determining that a substance of concern has been released in an area declared to be a disaster area and has disrupted the transportation system of the United States, to carry out a program for the coordination, protection, assessment, monitoring and study of the health and safety of responding or affected individuals with high exposure levels. Requires that such a program: (1) apply to workers or volunteers, clean up workers, residents of the area, and persons who are employed in or who attend school in the area; (2) ensure that such individuals are informed about and protected against potential health impacts of any such substance in a timely manner, are monitored and studied for any health impacts, and receive health care referrals; and (3) ensure that information from any such monitoring and studies is used to prevent or protect against similar health impacts.

Requires the President to take appropriate measures to protect the privacy of any participant in a registry or study. Gives priority in any registry or study to the protection, monitoring, and study of the health and safety of individuals with the highest level of exposure to a substance of concern.

Allows the President to carry out such a program through a cooperative agreement with a medical institution.

Requires the Secretary, the Secretary of Homeland Security, and the Administrator of the Environmental Protection Agency (EPA) to jointly enter into a contract with the National Academy of Sciences to study disaster area health and environmental protection and monitoring.
