Climate Change Education Act - Requires the Director of the National Science Foundation to establish a Climate Change Education Program to: (1) broaden the understanding of climate change, possible long and short-term consequences, and potential solutions; (2) apply the latest scientific and technological discoveries to provide learning opportunities to people; and (3) emphasize actionable information to help people understand and to promote implementation of new technologies, programs, and incentives related to energy conservation, renewable energy, and greenhouse gas reduction.

Requires such Program to include: (1) a national information campaign to disseminate information on and promote implementation of the new technologies, programs, and incentives; and (2) a competitive grant program to provide grants to states, municipalities, educational institutions, and other organizations to create materials relevant to climate change and climate science, develop climate science kindergarten through grade 12 curriculum and supplementary educational materials, or publish climate change and climate science information.
