Bill	Relationship	Last Action
110 HR 1789	Identical bill	Mar 29, 2007: Referred to the Committee on the Budget, and in addition to the Committees on Rules, and Ways and Means, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

Expresses the sense of Congress that it is necessary to ensure that Congress is presented with reliable information from the Congressional Budget Office (CBO) and the Joint Committee on Taxation as to the dynamic macroeconomic feedback effects to changes in federal law and the probable behavioral responses of taxpayers, businesses, and other parties to such changes.

Requires the Joint Committee and CBO, using among other methods dynamic estimating techniques, to prepare fiscal estimates of each proposed change in federal revenue law on the basis of assumptions that estimate the probable behavioral responses of personal and business taxpayers and other relevant entities to such change and its dynamic macroeconomic feedback effects. Applies such requirement only to proposed changes that, pursuant to static fiscal estimates, have a fiscal impact exceeding \$250 million in any fiscal year.
