111 HR 3652	Related bill	<b>Sep 29, 2009:</b> Referred to the Subcommittee on Health.

Consistency, Accuracy, Responsibility, and Excellence in Medical Imaging and Radiation Therapy Act of 2010 - Amends the Public Health Service Act to require personnel who perform or plan the technical component of either medical imaging examinations or radiation therapy procedures for medical purposes to possess, effective January 1, 2013: (1) certification in each medical imaging or radiation therapy modality and service they plan or perform from a certification organization designated by the Secretary of Health and Human Services (HHS); or (2) state licensure or certification where such services and modalities are within the scope of practice as defined by the state for such profession and where the requirements for licensure, certification, or registration meet or exceed the standards established by the Secretary. Exempts physicians, nurse practitioners, and physician assistants from the requirements of this Act.

Directs the Secretary to: (1) establish minimum standards for personnel who perform, plan, evaluate, or verify patient dose for medical imaging examinations or radiation therapy procedures; (2) establish a program for designating certification organizations after consideration of specified criteria; (3) provide a process for individuals whose training or experience are determined to be equal to, or in excess of, those of a graduate of an accredited educational program in that specialty to demonstrate that their experience meets the educational standards for qualified personnel in their imaging modality or radiation therapy procedures; and (4) publish a list of approved accrediting bodies for such certification organizations. Authorizes the Secretary to develop alternative standards for rural or health professional shortage areas as appropriate to ensure access to quality medical imaging.

Amends title XVIII (Medicare) of the Social Security Act to allow Medicare payment for medical imaging and radiation therapy services, only if the examination or procedure is planned or performed by an individual who meets this Act's requirements.
