111 S 3230	Related bill	Apr 20, 2010: Read twice and referred to the Committee on Environment and Public Works.

Provides that compliance with the National Environmental Policy Act of 1969 (NEPA) does not require consideration of: (1) the climate change effects or greenhouse gas emissions of a proposed action and alternative actions; or (2) the relationship of climate change effects or greenhouse gas emissions to a proposed action or alternatives, including the relationship to proposal design, environmental impacts, mitigation, and adaptation measures.

Prohibits the provisions of a draft, proposed, or final results of any analysis, study, mitigation measure, adaptation measure, environmental impact statement or similar analysis, design proposal, action, or alternative developed pursuant to NEPA (including regulations) relating to climate change effects or greenhouse gas emissions from being the basis for any enforceable measure or action under any other provision of law.

Declares that this Act does not preempt or interfere with: (1) any authority to consider the climate change effects or greenhouse gas emissions effects of proposed legislation or regulations specifically addressing greenhouse gas emissions; or (2) requirements to consider the potential climate change effects or greenhouse gas emission effects of proposals for agency action during planning or design processes under provisions of law other than NEPA.
