Americans Making Power Act - Amends the Public Utility Regulatory Policies Act of 1978 to require each state regulatory authority, and each nonregulated electric utility, to adopt the net metering standard established in this Act unless the Federal Energy Regulatory Commission (FERC) determines that the net metering requirement in effect for such state complies with the federal standard. Establishes that net metering standard and related requirements.

Requires retail electric suppliers to make net metering available to customer-generators on a first-come-first-served basis.

Directs FERC to: (1) publish model standards for the physical connection between local distribution systems and qualified generation units; and (2) modify its Small Generator Interconnection Procedures to expedite permitting of qualified generation units up to 2,000 kilowatts

Directs FERC to promulgate regulations to ensure that simplified contracts will be used for the interconnection of qualified generation units by a retail electric supplier or local distribution company

Actions Timeline

- **Jul 1, 2010:** Introduced in House
- **Jul 1, 2010:** Referred to the House Committee on Energy and Commerce.
