Innovation in Education Act of 2011 - Amends the Elementary and Secondary Education Act of 1965 (ESEA) to require the Secretary of Education to establish and maintain a National Education Innovation Network of searchable databases or Internet websites that: (1) provide educators and administrators with information regarding the most promising practices and strategies for improving student achievement and turning around low-performing schools; and (2) allow educators and administrators to nominate new practices and strategies for inclusion in such databases or websites, recommend improvements to those already there, and exchange ideas with their peers.

Directs the Secretary to provide grants and technical assistance to states to establish a National Education Innovation Corps that connects educators and administrators with evidence-based solutions to the most critical problems of practice in local educational agencies and chronically low-performing schools.

Requires the Corps to be composed of: (1) knowledge brokers, who have expertise in education, research, and the implementation of innovations; and (2) practice experts, who have successful teaching experience.

Allocates Corps grants among states in proportion to each state's share of school improvement funds under part A of title I of the ESEA.
