EPA Science Advisory Board Reform Act of 2012 - Amends the Environmental Research, Development, and Demonstration Authorization Act of 1978 to revise the process of selecting members of the Science Advisory Board, guidelines for participation in Board advisory activities, and terms of office. (The Board provides scientific advice to the Administrator of the Environmental Protection Agency [EPA].)

Revises the procedures for providing advice and comments to the Administrator by: (1) including risk or hazard assessments in the regulatory proposals and documents made available to the Board, and (2) requiring advice and comments to be included in the record regarding any such proposal and published in the Federal Register.

Revises the operation of Board member committees and investigative panels to: (1) require that they operate in accordance with the membership, participation, and policy requirements (including new requirements for public participation in advisory activities of the Board) contained in this Act; (2) deny them authority to make decisions on behalf of the Board; and (3) prohibit direct reporting to EPA.

Adds guidelines for the conduct of Board advisory activities, including concerning: (1) avoidance of making policy determinations or recommendations, (2) communication of uncertainties, (3) dissenting members' views, and (4) periodic reviews to ensure that such activities address the most important scientific issues affecting EPA.
