Super Pollutant Emissions Reduction Act of 2013 or the SUPER Act of 2013 - Requires the President to establish the Task Force on Super Pollutants to:

- review existing and potential policies and measures that promote reduction of short-lived climate pollutants, in part by identifying and evaluating programs and activities of the federal government that contribute to such reduction;
- identify and recommend specific existing programs and activities that are duplicative and that can be consolidated to achieve greater efficiency and effectiveness;
- identify gaps where programs do not exist and recommend focused programs and activities to fill such gaps to achieve reductions of short-lived climate pollutants, with an emphasis on industry standards and public-private partnerships;
- identify, compile, evaluate, and develop best practices for reductions of short-lived climate pollutants; and
- report to Congress on its findings and recommendations.

Defines "short-lived climate pollutant" as black carbon, methane, hydrofluorocarbons, tropospheric ozone and its precursors, or emissions from banks of ozone-depleting substances.

Actions Timeline

- **May 10, 2013:** Referred to the Subcommittee on Energy and Power.
- **May 9, 2013:** Introduced in House
- **May 9, 2013:** Referred to the House Committee on Energy and Commerce.
