Department of Veterans Affairs Disease Reporting and Oversight Act of 2013 - Requires the director of a Veterans Integrated Service Network, within 24 hours after confirming the presence of a notifiable infectious disease (any infectious disease that is either on a specified published list of nationally notifiable diseases or that is covered by a provision of law of a state that requires the reporting of infectious diseases) at a Department of Veterans Affairs (VA) facility under that director's jurisdiction, to notify: (1) the Central Office of the VA; (2) the Director of the Centers for Disease Control and Prevention; (3) the state and county in which the facility is located; (4) each individual at the facility who has contracted the disease or is at risk of doing so, as well as the individual's next of kin, the individual's primary health care provider, and the county in which the individual resides; and (5) each VA employee of such facility. Requires such director to comply with any earlier notification required by the state concerned.

Requires such director to: (1) confirm receipt of such notification, (2) develop and implement an action plan to manage and control the potential spread of the disease, and (3) keep records of any such notifications for at least 10 years. Requires an annual report from the VA Inspector General to Congress on directors' compliance with the requirements of this Act. Provides for Inspector General enforcement and appropriate director disciplinary action with respect to such requirements.

Directs the Under Secretary for Health of the Veterans Health Administration (VHA) to issue a directive to the VHA's pathology team, infection prevention team, facilities management team, and other appropriate VHA groups on the actions to be taken when a notifiable infectious disease is discovered in a VHA facility.
