113 HR 4667	Identical bill	<b>May 16, 2014:</b> Referred to the Subcommittee on Energy and Power.

Nuclear Plant Decommissioning Act of 2014 - Amends the Atomic Energy Act of 1954 to require a Nuclear Regulatory Commission (NRC) licensee, after consulting each affected state and local governments, to develop and submit to the NRC a post-shutdown decommissioning activities report (PSDAR) for any of the licensee's shutdown facilities for which a PSDAR is required.

Requires the NRC to: (1) solicit written comments on the proposed PSDAR from the public and conduct at least two public hearings in the facility's host state; and (2) invite the host state to file a statement of support, of conditional support with specific recommendations for changes, or of nonsupport for the proposed PSDAR.

Directs the NRC, after receiving the state's statement of support or nonsupport, to determine whether the proposed PSDAR is adequate or inadequate on the basis of specified considerations, and issue a decision of approval or disapproval, as appropriate.

Prescribes requirements for determining whether a proposed PSDAR is permissible if the host state files a statement of conditional support.

Requires a licensee to develop and submit a new proposed PSDAR if the first one is rejected.

Prohibits the NRC from approving a proposed PSDAR unless it includes a requirement that the licensee comply with state law relating to air, water, or soil quality or radiological standards if they are more restrictive than federal law.
