Excellence in Diagnostic Imaging Utilization Act of 2013 - Amends title XVIII (Medicare) of the Social Security Act (SSA) to establish appropriateness requirements for certain outpatient advanced diagnostic imaging services for which payment is made under the technical or professional component of the physicians' fee schedule or the prospective payment system for hospital outpatient department services.

Defines "applicable advanced diagnostic imaging services" as those for which defined appropriate use criteria (and related guidelines) have been: (1) developed or endorsed by national professional medical specialty societies, and (2) selected by the Secretary of Health and Human Services (HHS) in consultation with such societies and other stakeholders.

Directs the Secretary to: (1) qualify imaging appropriateness registries developed and maintained by such societies, (2) publish a list of qualified suppliers of approved electronic clinical decision support tools, and (3) establish standards for the approval of such tools.

Directs the Secretary, for the purpose of making incentive payments for quality reporting, to treat an eligible advanced diagnostic imaging services professional as satisfactorily submitting data on quality measures if, instead of reporting measures under the established quality reporting system, the professional demonstrates compliance with the registry submission or consultation requirements of this Act for at least 90% of claims for applicable advanced diagnostic imaging services submitted in the year. Limits this treatment to eligible professionals who furnish the technical or professional component of applicable advanced diagnostic imaging services or who order such services.

## **Actions Timeline**

---

- **Dec 13, 2013:** Referred to the Subcommittee on Health.
- **Dec 11, 2013:** Introduced in House
