Expresses the sense of the Senate that United States should: (1) develop a strategy to incentivize development of the Internet of Things for connected technologies to empower consumers, foster future economic growth, and improve collective social well-being; (2) recognize the importance of consensus-based best practices and communication among businesses and stakeholders; and (3) commit to using the Internet of Things to improve its efficiency and effectiveness and to cut waste, fraud, and abuse.

Calls on U.S. innovators to commit to improving the quality of life for future generations by developing safe, new technologies aimed at tackling the most challenging societal issues facing the world.
