This bill requires the Department of Energy to develop an implementation strategy to promote the development of hybrid micro-grid systems for isolated communities, particularly communities exposed to extreme weather conditions and high costs of energy, including electricity, space heating and cooling, and transportation.

A hybrid micro-grid system is a stand-alone electrical system composed of conventional generation and at least one alternative energy resource.

Mandatory considerations in developing the strategy include:

- the potential for renewable resources, including wind, solar, and hydropower, to be integrated into a hybrid micro-grid system;
- the capacity of the local workforce to operate, maintain, and repair a hybrid micro-grid system; and
- the need for basic infrastructure to develop, deploy, and sustain a hybrid micro-grid system.

Actions Timeline

- **May 14, 2015:** Committee on Energy and Natural Resources. Hearings held. Hearings printed: S.Hrg. 114-65.
- **May 6, 2015:** Introduced in Senate
- **May 6, 2015:** Read twice and referred to the Committee on Energy and Natural Resources.
