Promoting New Manufacturing Act

This bill requires the Environmental Protection Agency (EPA) to publish on its website, with respect to FY2008 and each fiscal year thereafter, estimates of:

- the total number of preconstruction permits issued by the EPA under the Clean Air Act's New Source Review Program for the construction or modification of a major stationary source (any stationary facility or source of air pollutants which directly emits, or has the potential to emit, 100 tons per year or more of any regulated air pollutant);
- the percentage of permits issued within one year of the application; and
- the average length of time for the EPA's Environmental Appeals Board to decide appeals of decisions to grant or deny a permit.

A new or revised national ambient air quality standard (NAAQS) may not apply to the review and disposition of a preconstruction permit application until the EPA publishes final implementation regulations and guidance that include information relating to submission and consideration of a preconstruction permit application under the standard.

The EPA must submit annually a report on actions to expedite the process for review of preconstruction permits.

Actions Timeline

- **May 21, 2015:** Introduced in Senate
- **May 21, 2015:** Read twice and referred to the Committee on Environment and Public Works.
