National Volcano Early Warning and Monitoring System Act

This bill directs the United States Geological Survey (USGS) to establish the National Volcano Early Warning and Monitoring System to monitor, issue warnings of, and protect U.S. citizens from undue and avoidable harm from, volcanic activity.

The purposes of the System are to: (1) organize, modernize, standardize, and stabilize the monitoring systems of U.S. volcano observatories; and (2) unify such systems into a single interoperative system. The objective of the System is to monitor all U.S. volcanoes at a level commensurate with the threat posed by the volcanoes by: (1) upgrading existing networks on monitored volcanoes, and (2) installing new networks on unmonitored volcanoes.

The System shall include: (1) a national volcano watch office that is operational 24 hours a day and 7 days a week, (2) a national volcano data center, (3) an external grants program to support research in volcano monitoring science and technology, and (4) modernization activities including the comprehensive application of emerging technologies.

The USGS must: (1) submit to Congress a five-year management plan for establishing and operating the System, and (2) establish an advisory committee to assist in implementing the System.

The USGS may enter into cooperative agreements designating institutions of higher education and state agencies as volcano observatory partners for the System.

Actions Timeline

- **Sep 22, 2016:** Committee on Energy and Natural Resources. Hearings held. Hearings printed: S.Hrg. 114-509.
- **Sep 17, 2015:** Introduced in Senate
- **Sep 17, 2015:** Read twice and referred to the Committee on Energy and Natural Resources.
