Protecting Access to Diabetes Supplies Act of 2016

This bill amends title XVIII (Medicare) of the Social Security Act to modify provisions relating to Medicare's competitive acquisition program (through which rates are set through a competitive bidding program rather than by an established fee schedule) with respect to diabetic testing strips. Specifically, the bill requires the Centers for Medicare & Medicaid Services (CMS) to:

- use specified data to determine whether a bid satisfies certain requirements related to volume of coverage with respect to such products,
- reject a bid if the bidder does not demonstrate its ability to furnish such products in a manner consistent with its bid, and
- establish a process to monitor the extent to which an entity continues to cover the product types included in its bid.

CMS may terminate a contract if it determines that an entity, for reasons other than product discontinuation or market-wide shortage, fails to maintain ready access to such products included its bid.

In addition, the bill specifies that an entity furnishing such products to beneficiaries under the program: (1) must furnish to each beneficiary a brand of strips that is compatible with the beneficiary's home blood glucose monitor, (2) may not attempt to influence or incentivize a beneficiary to switch the brand of either type of product, and (3) must contact and receive a request from a beneficiary no more than 14 days prior to dispensing a refill to the beneficiary.

Actions Timeline

- **Nov 16, 2016:** Introduced in Senate
- **Nov 16, 2016:** Read twice and referred to the Committee on Finance.
