Yakima River Basin Water Enhancement Project Phase III Act

This bill expands the purposes of the Yakima River Basin Water Conservation Program to include:

- protection, mitigation, and enhancement of fish and wildlife and the recovery and maintenance of self-sustaining harvestable populations of fish and other aquatic life, both anadromous and resident species, in the Yakima River Basin;
- improving the reliability of municipal, industrial, and domestic water supply and use purposes, especially during drought years;
- implementation of the Yakima River Basin Integrated Water Resource Management Plan to realize water savings of not less than 85,000 acre feet;
- encouraging an increase in the use of water transfers, leasing, markets, and other voluntary transactions among public and private entities to enhance water management in the Yakima River Basin;
- improving the resilience of the ecosystems, economies, and communities in the Basin as they face drought and other changes; and
- authorizing and implementing the Yakima River Basin Integrated Water Resource Management Plan as Phase III of the Yakima River Basin Water Enhancement Project.

The bill directs the Conservation Advisory Group to provide recommendations to advance the purposes and programs of the Yakima River Basin Enhancement Project.

Water acquisition efforts may continue as needed to provide water to be used by the Yakima Project Manager for instream flow purposes and to allow voluntary water acquisitions to provide improved instream flows for anadromous and resident fish and other aquatic life.

The bill modifies authorities for Yakima Basin Water Projects, including for the development of additional storage capacity at Lake Cle Elum and the enhancement of water supplies for Yakima Basin Tributaries.

The Yakima Indian Nation is redesignated as the Yakama Nation.

The Department of the Interior may conduct studies to evaluate measures to further Yakima Project purposes on tributaries to the Yakima River.

The bill directs Interior to:

- implement the Integrated Plan as Phase III of the Yakima River Basin Water Enhancement Project, subject to feasibility studies, environmental reviews, cost-benefit analyses, and available appropriations;
- implement an initial development phase of the Integrated Plan and develop plans for the intermediate and final development phases of the Integrated Plan;
- complete upstream and downstream fish passage facilities at Cle Elum Reservoir and another Yakima Project reservoir;
- negotiate long-term agreements for a pump plan and associated facilities to access and deliver inactive storage at Kachess Reservoir and a conveyance system to allow water transfers from Keechelus Reservoir to Kachess Reservoir ("K to K Pipeline");
- participate in, provide funding for, and accept non-federal financing for water conservation projects intended to

conserve 85,000 acre feet of water and for aquifer storage and recovery projects;

- conduct studies, feasibility analyses and environmental reviews of fish passage, water supply, conservation, habitat restoration projects, and other alternatives for the initial and future phases of the Integrated Plan;
- coordinate with and assist the state of Washington in implementing a robust water market to enhance water management in the Yakima River Basin;
- enter into cooperative agreements with, or make grants to, the Yakama Nation, the state of Washington, or other entities subject to a 50% non-federal cost-sharing requirement; and
- retain authority and discretion over the management of project supplies to optimize operational use and flexibility to ensure compliance with all applicable laws and treaty rights of the Yakama Nation.

Interior, in conjunction with the state of Washington and in consultation with the Yakama Nation, must report, not later than five years after enactment of this bill, on the development and implementation of the Integrated Plan.

Actions Timeline

- **Mar 8, 2016:** Referred to the Subcommittee on Water, Power and Oceans.
- **Mar 3, 2016:** Introduced in House
- **Mar 3, 2016:** Referred to the House Committee on Natural Resources.
