## Summary (as of May 6, 2016)

### Technologies for Energy Security Act

This bill amends the Internal Revenue Code to extend and modify the tax credits for residential energy efficient property and investments in energy property.

The bill modifies the tax credit for residential energy efficient property to extend through 2021 the credits for expenditures for fuel cell property, small wind energy property, and geothermal heat pump property. For each extended credit, the bill phases out the current credit rate of 30% of expenditures by reducing it to 26% or 22%, depending on the date that the property is placed in service.

The bill extends the tax credit for investments in energy property for the following property with construction that begins before January 1, 2022:

- fiber-optic solar energy property,
- fuel cell property,
- microturbine property,
- combined heat and power system property,
- small wind energy property, and
- thermal energy property.

The bill phases out the current credit rate of 30% for investments in fuel cell property, small wind energy property, and fiber-optic solar energy property by reducing it to 26% or 22%, depending on the date that the property is placed in service.

## Actions Timeline

- **May 6, 2016:** Introduced in House
- **May 6, 2016:** Referred to the House Committee on Ways and Means.

# LegiList

CONGRESS, MADE CLEAR.

## Search Every Federal Bill, Law, and Vote

LegiList is the fastest way to research Congress. Track any bill from introduction to enactment, see how every legislator voted, follow committee activity, and read the full text of every bill — all in one place, always up to date.
