Ratepayer Fairness Act of 2017

This bill amends the Public Utility Regulatory Policies Act of 1978 to require a state regulatory authority and a nonregulated electric utility, to the extent that they allow electric utility rates to include charges that subsidize customer-side technology, to consider whether that subsidy would:

- result in benefits predominately enjoyed by only the users of the customer-side technology;
- shift costs of a customer-side technology to electricity consumers who do not use it, particularly in cases in which disparate economic or resource conditions exist among the electricity consumers cross-subsidizing the customer-side technology;
- negatively affect resource utilization, fuel diversity, grid reliability, or grid security;
- give any unfair competitive advantage to market the customer-side technology, including an analysis of whether a state regulatory authority has uncovered fraudulent customer-side technology marketing practices; and
- be necessary to fulfill an obligation to serve electric consumers.

The bill sets deadlines within which the regulatory authority or electric utility must set a hearing date to consider and subsequently determine the subsidization of customer-side technology.

Actions Timeline

- **Mar 17, 2017:** Referred to the Subcommittee on Energy.
- **Mar 16, 2017:** Introduced in House
- **Mar 16, 2017:** Referred to the House Committee on Energy and Commerce.
