## **Carbon Capture Improvement Act of 2017**

This bill amends the Internal Revenue Code to authorize the issuance of tax-exempt facility bonds for the financing of qualified carbon dioxide capture facilities.

A "qualified carbon dioxide capture facility" is any equipment installed in an industrial carbon dioxide facility that satisfies specified capture and storage requirements and: (1) is used for the capture, treatment and purification, compression, transportation, or on-site storage of carbon dioxide produced by the industrial carbon dioxide facility; or (2) is integral or functionally related and subordinate to a gasification process that converts a product from coal, petroleum residue, biomass, or other materials which are recovered for their energy or feedstock value into a synthesis gas composed primarily of carbon dioxide and hydrogen for direct use or subsequent chemical or physical conversion.
