## Ozone Standards Implementation Act of 2017

This bill amends the Clean Air Act by revising the National Ambient Air Quality Standards (NAAQS) program.

The bill delays the implementation of the ozone NAAQS that were published in 2015. The bill extends until: (1) October 26, 2024, the deadline for states to submit designations to implement the 2015 ozone NAAQS; and (2) October 26, 2025, the deadline for the Environmental Protection Agency (EPA) to designate state areas as attainment, nonattainment, or unclassifiable areas with respect to the 2015 ozone NAAQS. States must submit a state implementation plan (SIP) by October 26, 2026, to implement, maintain, and enforce the 2015 ozone NAAQS.

The bill also changes the review cycle for criteria pollutant NAAQS from a 5-year review cycle to a 10-year review cycle. The EPA may not complete its next review of ozone NAAQS before October 26, 2025.

Prior to establishing or revising NAAQS, the EPA must obtain advice from its scientific advisory committee regarding potential adverse public health, welfare, social, economic, or energy effects which may result from attaining and maintaining NAAQS.

The EPA must publish regulations and guidance for implementing NAAQS concurrently with the issuance of a new or revised standard. New or revised NAAQS must not apply to preconstruction permits for constructing or modifying a major emitting facility or major stationary source of air pollutants until those regulations and guidance have been published.

The bill revises requirements concerning SIPs for extreme ozone nonattainment areas and particulate matter nonattainment areas.

## Actions Timeline

---

- **May 23, 2017:** Committee on Environment and Public Works Subcommittee on Clean Air and Nuclear Safety. Hearings held. With printed Hearing: S.Hrg. 115-103.
- **Feb 1, 2017:** Introduced in Senate
- **Feb 1, 2017:** Read twice and referred to the Committee on Environment and Public Works.
