IRS Information Technology Accountability Act

This bill amends the Internal Revenue Code to establish the position of Internal Revenue Service (IRS) Chief Information Officer (CIO) to be responsible for the development, implementation, and maintenance of information technology for the IRS.

The duties and responsibilities of the CIO include:

- ensuring that the information technology is secure and integrated,
- maintaining operational control of the information technology,
- being the principal advocate for the information technology needs of the IRS,
- developing and implementing a multiyear strategic plan for IRS information technology needs, and
- consulting with the IRS Chief Procurement Officer to ensure that requirements of this bill and the strategic plan are met.

The IRS must enter into a contract with an independent reviewer to verify and validate the implementation plans developed for the Customer Account Data Engine 2 and the Enterprise Case Management System.

The IRS Chief Procurement Officer must identify all significant IRS information technology acquisitions and notify the CIO before the acquisitions. The officer must also regularly consult with the CIO regarding acquisitions of IRS information technology.
