Summary (as of Feb 14, 2019)

Crowd Sourcing of Environmental Data Act of 2019

This bill authorizes states to monitor certain criteria air pollutants (i.e., lead, ozone, particulate matter, or sulfur dioxide) by greatly increasing the number of air quality sensors under their state implementation plans.

The Environmental Protection Agency (1) may not enforce a requirement concerning the method of monitoring if the derived data meets quality standards, and (2) must allow states to consider data derived from such methods when determining whether national ambient air quality standards for criteria air pollutants were exceeded.

Actions Timeline

- **Feb 15, 2019:** Referred to the Subcommittee on Environment and Climate Change.
- **Feb 14, 2019:** Introduced in House
- **Feb 14, 2019:** Referred to the House Committee on Energy and Commerce.
