No related bills are listed.

This bill instructs the Department of the Interior to allow for the introduction of a small number of free-roaming wild horses from the Cape Lookout National Seashore in North Carolina as necessary to ensure the genetic diversity of the wild horse population in and around Currituck National Wildlife Refuge, consistent with the December 2014 Wild Horse Management Agreement.

Interior may enter into an agreement with the Corolla Wild Horse Fund to provide for the cost-effective management of the horses in and around the refuge while ensuring that its natural resources are not adversely impacted. Such agreement shall require the fund to pay the costs associated with:

- conducting a periodic census of, and inspecting the health of, the horses;
- maintaining records of the horses living in the wild and those living in confinement;
- conducting the removal and placement of horses and monitoring horses removed from the Currituck County Outer Banks; and
- administering a viable population-control plan for the horses.

#### **Actions Timeline**
