Made in America Shipbuilding Act of 2020

This bill expands domestic content requirements for certain shipboard components.

Specifically, the bill (1) prohibits an executive agency from entering into a contract for the acquisition, construction, or conversion of a vessel unless the vessel is to be constructed or converted in the United States; and (2) lists components that may be procured for vessels only if manufactured in the United States.

An agency may waive such limitation under specified circumstances, such as when the limitation would increase the cost of the overall acquisition by more than 25% or cause unreasonable delays.

An agency may not (with exceptions) enter into a contract (1) for the procurement of end items or components for ships that contain a specialty metal not melted or produced in the United States; and (2) for the construction of a vessel unless the steel, iron, aluminum, and manufactured products to be used in the construction are produced in the United States.

If a court or federal agency determines that a person intentionally affixed a label bearing a *Made in America* inscription to specified products sold in or shipped to the United States that were not made domestically, that person shall be debarred from contracting with the government for at least five years.

Actions Timeline

- **Sep 24, 2020:** Introduced in Senate
- **Sep 24, 2020:** Read twice and referred to the Committee on Homeland Security and Governmental Affairs.
