## **Sinkhole Mapping Act of 2019**

This bill directs the United States Geological Survey (USGS) to establish a program to

- study the short-term and long-term mechanisms that cause sinkholes, including extreme storm events, prolonged droughts causing shifts in water management practices, aquifer depletion, and other major changes in water use; and
- develop maps depicting the zones that are at greater risk of forming sinkholes.

The USGS must establish a public website that displays such maps and other relevant information critical for use by community planners and emergency managers.

## **Actions Timeline**

---

- **Jun 4, 2020:** Reported by the Committee on Natural Resources. H. Rept. 116-427.
