Summary (as of Nov 20, 2020)

Marine Mammal Climate Change Protection Act

This bill updates the Marine Mammal Protection Act of 1972 to address the effects of climate change, including by establishing a program to monitor the adverse impacts of climate change on marine animals and requiring the National Oceanic and Atmospheric Administration and the U.S. Fish and Wildlife Service to create a process to list and promote the conservation marine mammal species and population stocks in waters under U.S. jurisdiction for which climate change has more than a remote possibility of resulting in a decline in population, impeding population recovery, or reducing carrying capacity.

Actions Timeline

- **Nov 20, 2020:** Introduced in House
- **Nov 20, 2020:** Referred to the House Committee on Natural Resources.
