## National Landslide Preparedness Act

This bill directs the U.S. Geological Survey (USGS) to establish a National Landslide Hazards Reduction Program to identify and understand landslide hazards and risks, reduce losses from landslides, protect communities at risk of landslide hazards, and help improve communication and emergency preparedness.

The USGS shall, among other things

- develop and publish a national strategy for landslide hazards, risk reduction, and response in the United States (including territories);
- develop and maintain a publicly accessible national landslide hazard and risk inventory database;
- expand the early warning system for debris flow; and
- establish emergency response procedures for the rapid deployment of federal scientists, equipment, and services to areas impacted by a significant landslide event.

The USGS may provide grants to research, map, assess, and collect data on landslide hazards.

The National Science Foundation may provide grants to eligible entities for landslide research.

The USGS (1) shall advance the identification, mapping, research, and monitoring of subsidence and groundwater resource accounting, particularly in areas affected by drought; (2) shall establish the 3D Elevation Program and the 3D Elevation Federal Interagency Coordinating Committee; and (3) may make grants and enter into cooperative agreements to facilitate the improvement of nationwide coverage of 3D elevation data.

## Actions Timeline

---

- **Jan 5, 2021:** Signed by President.
- **Jan 5, 2021:** Became Public Law No: 116-323.
- **Dec 24, 2020:** Presented to President.
- **Dec 17, 2020:** Message on Senate action sent to the House.
- **Dec 16, 2020:** Passed/agreed to in Senate: Passed Senate without amendment by Unanimous Consent.(consideration: CR S7556)
