Made in America Act of 2021

This bill requires that materials used in carrying out federal infrastructure aid programs are produced in the United States, with exceptions.

The term *produced in the United States* means, in the case of

- iron or steel products, that all manufacturing processes for the iron or steel product, from the initial melting stage through the application of coatings, occurred in the United States;
- manufactured products, that the product was manufactured in the United States and that the cost of the components of the manufactured product that are mined, produced, or manufactured in the United States is greater than 50% of the total cost of all components of the manufactured product; and
- construction materials, that all manufacturing processes for the construction material occurred in the United States.

The Department of Commerce must (1) issue uniform standards that define the term *all manufacturing processes* for purposes of this bill, and (2) take into consideration and seek to maximize the jobs benefited or created in the production of the construction material.

The bill requires that all steel, iron, manufactured products, nonferrous metals, plastic, concrete and aggregates, glass (including optical glass), lumber, and drywall used in these programs be produced in the United States.

Infrastructure addressed by this bill includes federal-aid highways, railroads, public transportation infrastructure, civil aviation infrastructure, drinking water infrastructure, and stormwater infrastructure.

Actions Timeline

- **Apr 13, 2021:** Introduced in Senate
- **Apr 13, 2021:** Read twice and referred to the Committee on Homeland Security and Governmental Affairs.
