## Summary (as of Jun 8, 2021)

### Filthy Fifty Act

This bill requires the Department of Defense (DOD) to complete testing for perfluoroalkyl and polyfluoroalkyl substances (PFAS) at all military installations, formerly used defense sites, and state-owned facilities of the National Guard in the United States. PFAS are man-made and may have adverse human health effects.

Not later than 60 days following the detection of PFAS at a military installation, formerly used defense site, or state-owned facility of the National Guard, DOD must take removal actions to ensure that all individuals served by a drinking water source contaminated by PFAS have access to drinking water that meets the applicable standard, regardless of whether DOD is the drinking water purveyor. Additionally, DOD must complete all physical construction required for the remediation of PFAS at such sites not later than 10 years after the enactment of this bill.

DOD must report to Congress identifying the status of remediation efforts at 50 specified sites, such as England Air Force Base, Louisiana. DOD must complete all physical construction required for the remediation of PFAS at the 50 specified sites not later than five years after the enactment of this bill.

### Actions Timeline

- **Jun 8, 2021:** Introduced in Senate
- **Jun 8, 2021:** Read twice and referred to the Committee on Armed Services.
