Summary (as of Mar 23, 2021)

Prioritizing Revised Operations To Eliminate Cyanobacteria Toxins in Florida Act or the PROTECT Florida Act

This bill modifies requirements regarding water infrastructure projects in central and southern Florida.

Specifically, the U.S. Army Corps of Engineers (USACE) must include in such projects specified public health considerations, including those related to cyanobacteria (blue-green algae) and other toxins.

The bill also prohibits the use of restoration funds for deep well injection (a liquid-waste disposal technology).

In addition, the USACE must (1) develop a master operational manual to ensure system management that protects public health and Everglades restoration; and (2) with the National Academies of Sciences, study the legacy of pollution and nutrient loading, as well as the impacts of soil amendments.

Actions Timeline

- **Mar 24, 2021:** Referred to the Subcommittee on Water Resources and Environment.
- **Mar 23, 2021:** Introduced in House
- **Mar 23, 2021:** Referred to the House Committee on Transportation and Infrastructure.
