

HR 2202

Fracturing Responsibility and Awareness of Chemicals Act of 2021

Congress: 117 (2021–2023, Ended)

Chamber: House

Policy Area: Environmental Protection

Introduced: Mar 26, 2021

Current Status: Referred to the Subcommittee on Environment and Climate Change.

Latest Action: Referred to the Subcommittee on Environment and Climate Change. (Mar 29, 2021)

Summary (as of Mar 26, 2021)

Fracturing Responsibility and Awareness of Chemicals Act of 2021

This bill revises drinking water requirements concerning hydraulic fracturing (fracking) operations. Hydraulic fracturing, or fracking, is a process to extract underground resources such as oil or gas from a geologic formation by injecting water, a propping agent (e.g., sand), and chemical additives into a well under enough pressure to fracture the geologic formation.

The bill gives the Environmental Protection Agency (EPA) the authority to protect groundwater sources (e.g., wells) from certain pollution risks posed by fracking operations.

The bill also establishes requirements for disclosing the chemicals intended for use in fracking operations as well as the chemicals actually used in the operations. If the proprietary chemical formulas of chemicals used in fracking operations are necessary for treatment in medical emergencies, then the operations must disclose the formulas or the specific chemical identities of trade secret chemicals to the state, the EPA, or the treating physicians or nurses upon request, regardless of whether written statements of need or confidentiality agreements have been provided.

Actions Timeline

- **Mar 29, 2021:** Referred to the Subcommittee on Environment and Climate Change.
- **Mar 26, 2021:** Introduced in House
- **Mar 26, 2021:** Referred to the House Committee on Energy and Commerce.
