

HR 2854

Utility Resilience and Reliability Act

Congress: 117 (2021–2023, Ended)

Chamber: House

Policy Area: Energy

Introduced: Apr 26, 2021

Current Status: Referred to the Subcommittee on Energy.

Latest Action: Referred to the Subcommittee on Energy. (Apr 27, 2021)

Utility Resilience and Reliability Act

This bill addresses the reliability of electric energy provided by the bulk-power system, which includes facilities and control systems necessary for operating an interconnected electric energy transmission network.

Specifically, the Electric Reliability Organization must file with the Federal Energy Regulatory Commission a proposed reliability standard that addresses the resilience of the bulk-power system. For example, the standard must address the system's ability to withstand and rapidly recover from disruptions, such as extreme weather conditions. The standard must take into account regional differences.

In addition, the Department of Energy (DOE) must establish a program to provide information and recommendations to states and electric utilities on how to improve the resilience of electric grids. DOE must also post on its website a report that provides recommendations on how to minimize the need for, effects of, and duration of planned electric power outages that are due to extreme weather conditions.

Actions Timeline

- **Apr 27, 2021:** Referred to the Subcommittee on Energy.
- **Apr 26, 2021:** Introduced in House
- **Apr 26, 2021:** Referred to the House Committee on Energy and Commerce.
