### Summary (as of Jun 4, 2021)

#### Power Line Resiliency Act

This bill directs the Department of Energy (DOE) to establish a five-year program to provide grants to electric utilities to (1) improve the performance or efficiency of a power line, (2) make a power line more resilient to an extreme weather event, or (3) otherwise ensure that an end-user has access to electricity during an extreme weather event.

DOE must prioritize providing grants to electric utilities that sell electricity in an area that has a history of extreme weather events.

## Actions Timeline

---

- **Jun 7, 2021:** Referred to the Subcommittee on Energy.
- **Jun 4, 2021:** Introduced in House
- **Jun 4, 2021:** Referred to the House Committee on Energy and Commerce.
