Critical Mineral Access Act

This bill authorizes the U.S. International Development Finance Corporation to provide support to high-income economy countries for developing and processing specified critical materials if such support furthers U.S. national security interests. Critical materials include, for example, rare earth elements, aluminum, and uranium.

A *high-income economy country* is one with a per capita gross national income (GNI) that exceeds \$12,695 for 2021. Current law limits the corporation's activities to facilitating the economic development of countries with a per capita GNI below that amount.

Actions Timeline
