## Share the Savings with Seniors Act

This bill limits cost-sharing for chronic care drugs under the Medicare prescription drug benefit. *Chronic care drugs* include blood glucose regulators other than insulin, anticoagulants, and other categories of drugs as specified in the bill.

Specifically, for costs below the annual deductible, the bill caps cost-sharing for chronic care drugs at the net price of the drug (i.e., the negotiated price net of all manufacturer price concessions); for costs above the annual deductible and below the annual out-of-pocket threshold, cost-sharing must be based on a percentage of the drug's net price (if cost-sharing for that drug is tied to the price or cost of the drug).
