Summary (as of Nov 17, 2023)

Undoing National Lead Emissions through Authorizing Directed Education from DOT Act or the UNLEADED Act

This bill directs the Federal Aviation Administration (FAA) to establish and disseminate an education program to provide information about new unleaded aviation gasoline authorized for use in aircraft and aircraft engines by the FAA.

Specifically, the FAA must publish the information on an FAA website or a public website for general aviation pilots, flight schools, airport managers and operators, aircraft maintenance technicians, fixed-base operators, and other members of the general aviation community.

The bill includes specific information requirements, such as the FAA must provide information about the status of all variations of unleaded aviation gasoline undergoing evaluation and authorization for use by the FAA.

The FAA must also facilitate annual education and training for leadership and staff of fixed-base operators (in coordination with the general aviation industry, fuel providers, and fixed-based operators) to ensure that individuals assisting with transporting and handling unleaded aviation gasoline are informed of fuel type differences and the impacts such fuels have on airplanes.

The FAA must periodically brief Congress on the status of, and any findings with respect to, the education program.

Actions Timeline

- **Nov 20, 2023:** Referred to the Subcommittee on Aviation.
- **Nov 17, 2023:** Introduced in House
- **Nov 17, 2023:** Referred to the House Committee on Transportation and Infrastructure.
