China Technology Transfer Control Act of 2025

This bill controls exports of certain national interest technology and intellectual property to China.

Specifically, covered technology or intellectual property includes items that (1) would contribute significantly to the Chinese military to the detriment of U.S. national security, (2) are included in a designated list of product components compiled by the Office of the U.S. Trade Representative (USTR), or (3) are used by China to violate human rights or religious liberties.

The President must control exports to China of any covered technology or intellectual property. Further, the President must sanction (1) a foreign person who sells to China or purchases from China any covered item, and (2) a Chinese person who knowingly uses a covered item provided to them in violation of U.S. export control law.

The USTR must compile a list of certain products from China that are subject to the bill because they either receive designated support from the Chinese government or are used by China to violate human rights or religious liberties. The bill requires the USTR to include products from certain industries (e.g., civil aircraft, artificial intelligence, semiconductors, and biotechnology) on the list.
