One-Stop Pilot Program Extension Act

This bill revises and extends the One Stop Security program of the Transportation Security Administration (TSA). Under this pilot program, eligible passengers and their checked baggage arriving in the United States from certain foreign airports with connecting flights may be eligible to continue without additional TSA security re-screening.

The bill extends the pilot program through December 23, 2032, from the current December 23, 2028.

The bill also revises the security requirements for excluding checked baggage from additional TSA security re-screening. Among other things, the bill specifies that a passenger must be unable to access their checked baggage until arrival at their final destination and that U.S. Customs and Border Protection must have received timely images of the baggage from the participating foreign airport prior to a passenger's arrival in the United States.
